The annual cleanup of Tonopah will take place on Tuesday, Wednesday and Thursday of next week, April 11, 12 and 13. Official notice was issued today by Chief of Police O. H. Smith that residents will be expected to rake up their yards during the interim and place the rubbish in convenient piles that trucks may make the rounds on the days in question and remove the same.

Every resident should join in the movement in an effort to make Tonopah the "spotless town" of southern Nevada. With warm weather approaching, the time is most opportune for the town receiving a good raking.

DISMISSAL OF OFFICIALS TO BE EXPLAINED

President Harding Says There Was no Desire to Reflect on Character Anyone.

(By Associated Press) WASHINGTON, April 4.—The recent dismissal of upwards of 30 officials in the bureau of engraving and printing by President Harding involved no desire "to reflect upon the character of any government employee," said Secretary Christian in a letter to John J. Deviny, one of the dismissed executives. Christian declared the President regretted that "insinuating publicity" had attended the dismissal order and indicated a statement broadly covering the whole incident might be made later at the White House.

DISORDERS IN PENNSYLVANIA ARE REPORTED

Strike in Anthracite and Bituminous Fields Reported 100 Per Cent Effective.

HIGH TENSION WIRES SEVERED

Bomb Is Thrown Against House of Non-Union Miner in Colorado Camp.

(By Associated Press) WASHINGTON, April 4.—Chairman Nolan of the house labor committee, which has been hearing testimony in connection with the national coal strike, addressed a telegram today to the operators in Illinois, Indiana and eastern Ohio, telling them the United Mine Workers, through their president, John L. Lewis, had expressed a willingness to meet a representative body of the central competitive field. Telegrams asked the operators to indicate their attitude toward such a meeting. Other messages, Nolan said, probably will be sent to operators in the southern Ohio and western Pennsylvania fields.

(By Associated Press) PITTSBURGH, April 4.—The first disorders in the western Pennsylvania coal strike districts were reported from Fayette and Washington counties, where the authorities stated high tension electric wires, carrying current for the coal mines, had been cut, and details of the state police have been called out to disperse a crowd endeavoring to induce non-union men to leave their work.

CANDELARIA IS READY TO STAGE REAL COMEBACK

Extensive Improvements Being Made at Famous Old Camp by Big Corporation.

RAILROAD BEING EXTENDED

Three Hundred-Ton Mill Will be Ready to Start Ore Treatment in July.

Candelaria, famous for nearly half a century as one of the greatest silver camps in the west, is again being placed on the map. Mile for mile, a rejuvenation is rapidly taking place through the efforts of the Candelaria Mines company, and the next few months promises to witness a revival in metal production that has not been equaled before in Nevada, with the possible exception of the Comstocks.

It is hard, indeed, to bring what may practically be termed an abandoned camp, back to the good old days, and while the Candelaria Mines company may not be building a population equalling that of former years it promises to establish a production record that will be in keeping with the early history of the camp. C. D. Kaeding, president and general manager of the Candelaria Mines company, the main offices of which are maintained in San Francisco, having recently been moved from New York City, was a visitor last night to Tonopah, leaving this morning for Goldfield to look over the famous old gold camp. Mr. Kaeding, who was associated with Joe Thorn in the development of the Goldfield Consolidated Mines company during the years 1911-12-13, later going to Sudbury, Ontario, where he became manager of the International Nickel

WEATHERFORD, Tex., April 4.—Expressing opposition to everything the Ku Klux Klan stands for, as "far as I know," Federal Judge James C. Wilson, addressing the chamber of commerce last night, declared that Senator Culberson "did not miss it far" when he said "if permitted to continue, the Klan would soon overthrow the government." BELLEHELEN IS NOW ATTRACTING SOME ATTENTION

Bellehelen promises to become a lively place during the next few weeks. With the continued good weather a number of owners of property are making ready to invade that section and development will shortly be under way on a number of promising prospects. Work has been prosecuted during the past winter on various claims with satisfactory results, and the fact that there promises to be an influx of capital directing itself in that direction during the next few weeks argues well for the district in general.

It is reported from various sources that the Bellehelen district will be provided with a large milling plant before the season is very far advanced, and if such proves to be the case, the mill should not remain idle for lack of ores. There are a number of properties that have passed the prospect stage that could furnish a limited tonnage, while the Bellehelen mine is showing reserves of ore that are estimated in value from \$500,000 to \$900,000. While the ore now blocked is of a splendid grade the long haul to Tonopah prohibits the handling of the product at a fair margin of profit, and for that reason it becomes necessary to provide methods of reducing the ore on the ground.

THOUSANDS LETTERS ADDRESSED WRONG

(By Associated Press) CHICAGO, April 4.—From 50,000 to 100,000 letters are delayed at Chicago postoffice because the sender, writing to a firm or person presumably well known, give no street address, according to Postmaster Arthur C. Lueder. Incoming letters are sorted on the railway mail trains for direct delivery to sub-stations in various parts of the city. The railway mail clerks, unfamiliar with the addresses of firms or individuals, throw such letters aside.

HORNSILVER IS REAL SURPRISE TO INVESTORS

Orlean Mine Continues to Furnish New Surprise of Great Interest.

The Orlean mine at Hornsilver continues to furnish surprises to the mining fraternity of southern Nevada, and at present a heavy tonnage of ore is being broken in the southeast drift on the 700 level that carries average values of \$35 a ton. The ore vein measures four feet across and is showing for a good distance.

A surprise has developed in extending the northwest drift on the 700 level in view of the fact that the silver contents have almost entirely vanished with gold values taking their place. Little development is being performed on the fifth and sixth levels, but both are showing commercial bodies of ore.

There is a great deal of activity at Hornsilver, according to advices received in Tonopah, and a real old-fashioned mining boom is expected to develop within the next few weeks. Numerous inquiries are being received in Goldfield from outside points, not only touching upon the Orlean property, but regarding other prospects and mines that possess great merit.
